ROPDY

NEVER HAPPENED BEFORE

THE FIRST PEER TO PEER CLOSED COMMUNITY, RUNNING VIA TECHNOLOGY AND ALGORITHMS.

WHAT IS ROPDY ?

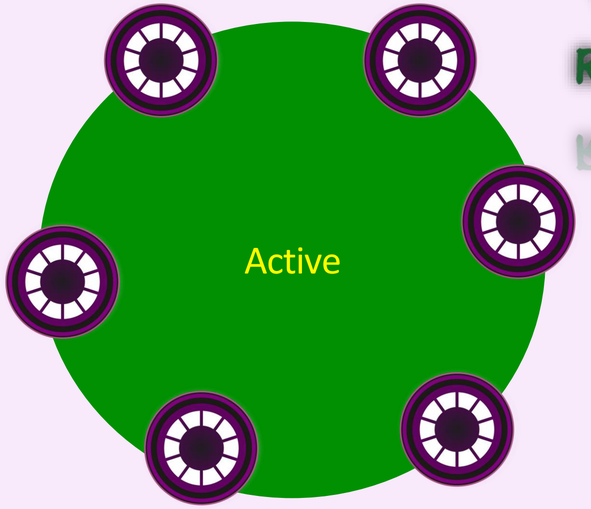
LETS EXPLORE

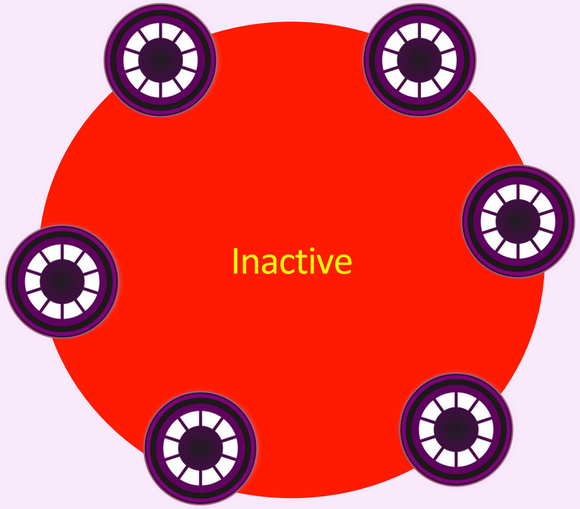
Ropdy is a software program which is created to raise RAMA coin with the help of a specific algorithm and protocol, called circle protocol.

There is two type of circle called Active Circle and Inactive Circle.

This software is developed with various algorithm for raising funds easily.

It is very simple concept to raise funds via working and non working program at the same time.





HOW ROPDY WORK'S ?

Active Circle :

To Get Active Circle user has to contribute RAMA Coin worth of $20, , you can purchase unlimited active circle via contribution of RAMA coin worth $20 for each.

When you contribute $20, its decided into two parts, as shown on pictures.

In active circle two type of payment you received, known and unknown payments.

Known payments (Direct Payment) : the people you invite directly when they buy circle you will receive $10 from each direct.

Unknown payments (Random Payment) : whenever someone buy circle you will get the second random payment in your circle, but time is not assured, it is running via algorithm.

In one circle maximum 6 payment of $10 can received.

The Person who invites you

The Person who is registered in Ropdy but you don't know him.

Ropdy

HOW ROPDY WORK'S ?

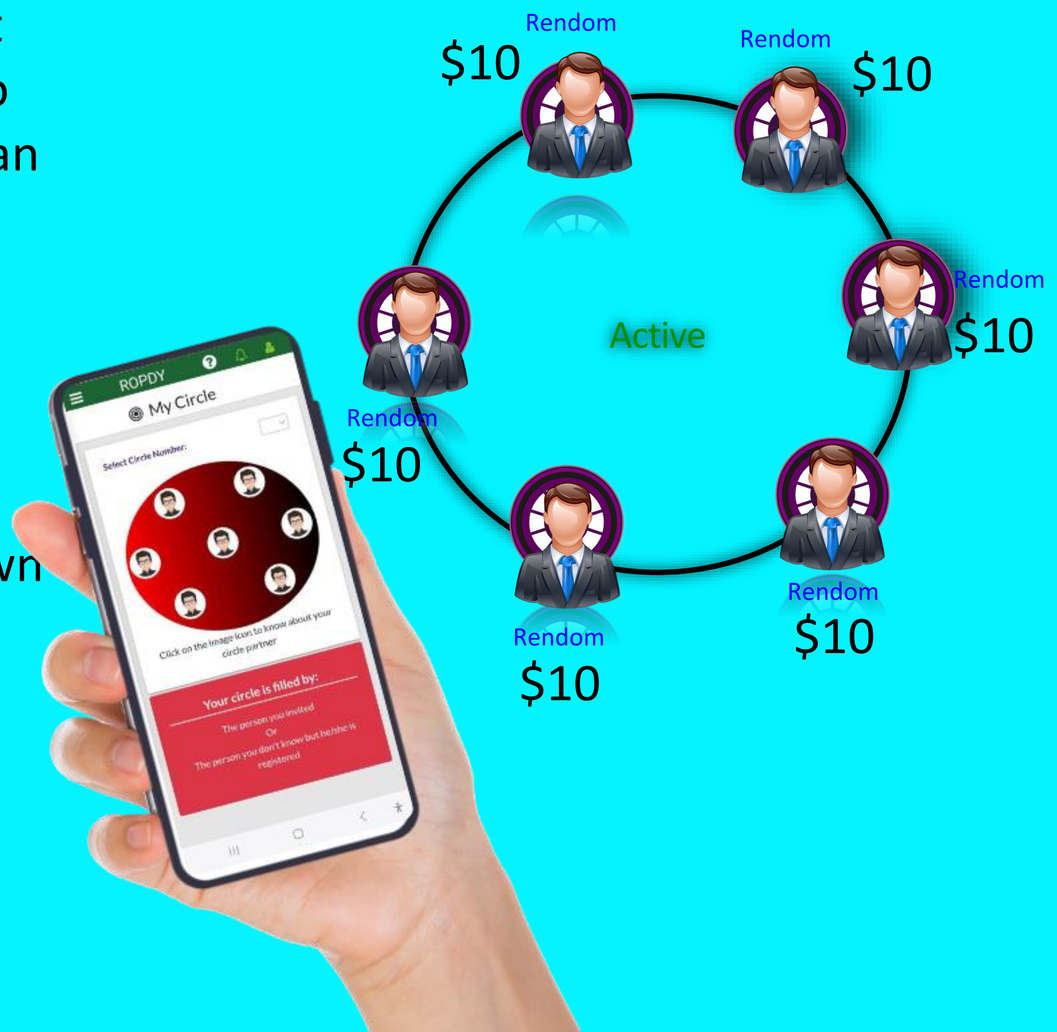
Ropdy

Active Circle :

At active circle if you didn't invite any person than you will get $10 from random six unknown persons, but it will take time to fill your circle, if you invite people and they purchase circle than you will get direct payment from your invitee and unknown payment will receive faster to fill your circle of 6 persons.

e.g. 1 (Non-Working Filling)

you buy a active circle and didn't invite any person under you than your circle look like this as per image, in this case unknown payments will receive faster than usual time.

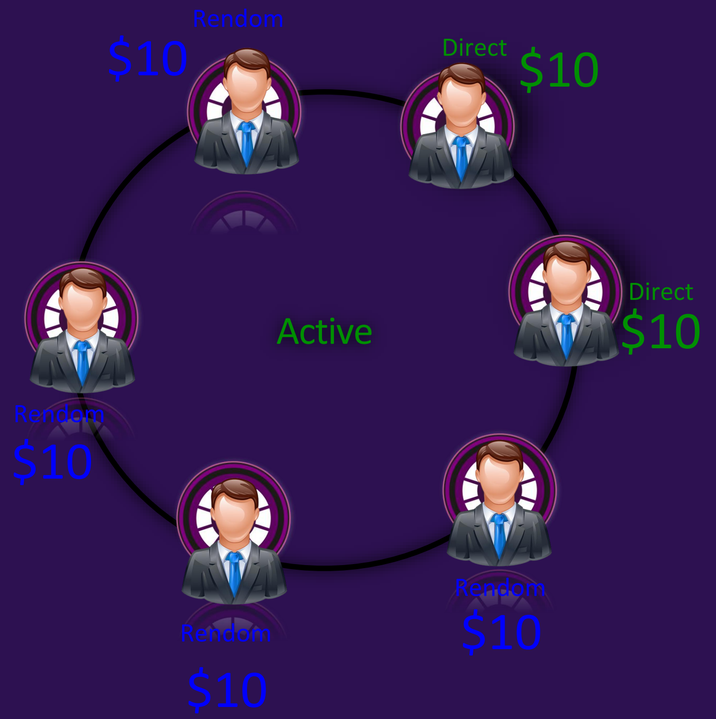


HOW ROPDY WORK'S ?

Ropdy

Active Circle :

At active circle if you didn't invite any person than you will get $10 from random six unknown persons, but it will take time to fill your circle, if you invite people and they purchase circle than you will get direct payment from your invitee and unknown payment will receive faster to fill your circle of 6 persons.



e.g. 2 (Working Faster Filling)

you buy a active circle and invite two persons than your circle look like this as per image, in this case unknown payments will receive faster than usual time.

HOW ROPDY WORK'S ?

Inactive Circle :

If you have inactive circle than you will receive direct referral only, not random payment's, if user activate inactive circle between filling from direct referral that you will receive unknown payments as well.

Note: If your direct referral repurchase the circle than you will missed the contribution of $10 if you have inactive circle.

HOW RANDOM DISTRIBUTION AI PROTOCOL WORKS ?

DURING ACTIVATION OF CIRCLE 50% OF ACTIVATION AMOUNT ($10) GOES TO HIS UP-LINE AND REST 50% ($10) GOES TO RANDOM PERSON DECIDED BY THE ALGORITHM PROGRAM !

NOW LET'S EXPLORE HOW DOES THIS WORKS?

THIS SOFTWARE IS AI ENABLED THE ARTIFICIAL INTELLIGENCE SYSTEM AUTO RECOGNISE THE PERSON WHO IS ABLE TO RECEIVE THE RANDOM AMOUNT ACCORDING TO MULTIPLE CALCULATION, LIKE

1. ACTIVE TEAM STATUS
2. FAST WORKING IN SHORTER PERIOD
3. LARGER TEAM GET MAXIMUM RANDOM PAYMENTS AND SMALLER TEAM SIZE GET LOWER RANDOM PAYMENTS
4. AI TOOL FORCE TO PROVIDE PRINCIPAL CONTRIBUTION FIRST

AI HAS LARGE NUMBER OF DATA FILTERING SYSTEM

EXAMPLE : PERSON A HAS MAKES TOTAL TEAM SIZE 50 IN 15 DAYS AND THE SAME SITUATIONS PERSON B ALSO HAS TEAM SIZE 50 BUT IN 30 DAYS, IN THIS CASE IN PERSON A TEAM WILL RECEIVE FASTER AND MAXIMUM RANDOM PAYMENTS AND TEAM OF B GET SLOWER RANDOM PAYMENTS.

NOTE : 5% AMOUNT WILL DEDUCT AS PLATFORM FEE DURING EACH $10 OF RECEIVING PAYMENT'S

HOW TO START ROPDY ?

INSTALL ROPDY APP ON ANY ANDROID PHONE VIA APK FILE OR DOWNLOAD FROM PLAY STORE

COMPLETE YOUR KYC

1. SET YOUR PROFILE PICTURE
2. COMPLETE YOUR PERSONAL INFORMATION
3. ADD RAMA WORTH $20 FROM ANY WALLET TO ROPDY APPLICATION VIA RAMA ADDRESS
4. SET WITHDRAWAL ADDRESS

YOU ARE ALL SET ….NOW INVITE AND EARN RAMA

ACTIVATE AUTO BUTTON

ENABLE AUTO CIRCLE ACTIVATION BUTTON, WHENEVER THE CIRCLE WILL FILLED BY DIRECT OR RANDOM PAYMENT THIS OPTION WILL AUTO ACTIVATE THE NEW CIRCLE FROM AVAILABLE BALANCE IN YOUR WALLET , JUST MAINTAIN YOUR BALANCE AND GET REST, JUST FOCUS ON WORK.

WHY RAMA COIN ?

What is Ramestta Blockchain ?

A Layer 2 Blockchain built on Polygon (Layer 1).

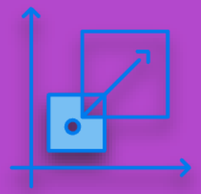
Designed for high-performance, low-cost, and scalable blockchain solutions.

Enhances transaction speed and reduces network congestion on Polygon.

KEY FEATURES

RAMESSTA

Scalability



Processes thousands of transactions per second (TPS).

Cost Efficiency

Drastically lower gas fees compared to Layer 1.

Developer-Friendly

Fully compatible with Ethereum Virtual Machine (EVM).

Eco-Friendly

Implements energy-efficient consensus mechanisms.

ADVANTAGES OF RAMA

For Users

- Minimal transaction costs.
- Lightning-fast transactions.

For Developers:

- Seamless dApp development with EVM compatibility.

For Businesses

- Scalable solutions for decentralized finance (DeFi), NFTs, and more.

For the Environment

- Lower energy consumption compared to traditional blockchains.

TECHNICAL OVERVIEW

Layer 1 (Polygon):

Provides security and base-layer scalability.

Layer 2 (Ramestta):

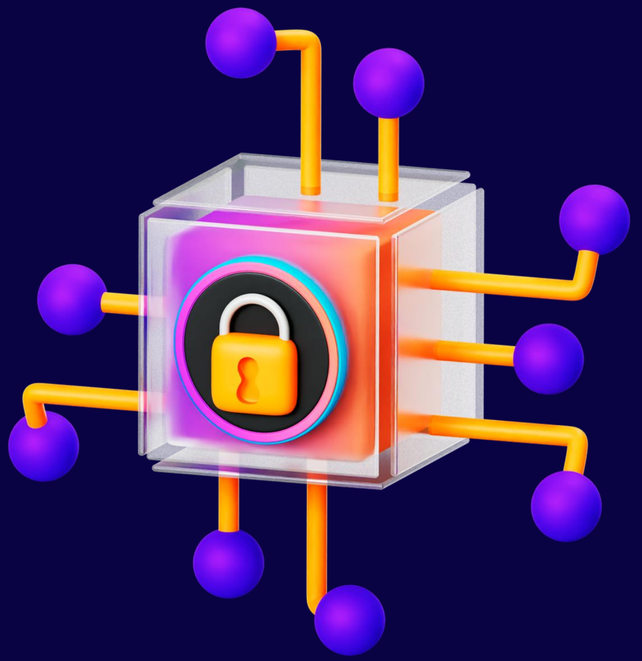
Optimized for off-chain computation and on-chain finality.

Consensus Mechanism:

Proof of Stake (PoS) ensures eco-friendly operations.

Interoperability:

Connects seamlessly with other Ethereum-based networks.



USE CASE OF RAMA COIN

Decentralized Finance (DeFi)	Gaming	Non-Fungible Tokens (NFTs)	Cross-Border Payments	dApps
Enabling secure, low-cost financial services.	Supports blockchain-based games and in-game economies.	Facilitates minting and trading of digital collectibles.	Instant and affordable global transactions.	Enabling secure, low-cost financial services.

THANK YOU

LET’S EARN RAMA FROM ROPDY AI PROTOCOL
